

# ADP VAC-PAC

## Vacuum Packaged Irradiated ALPHA-dri® PLUS™

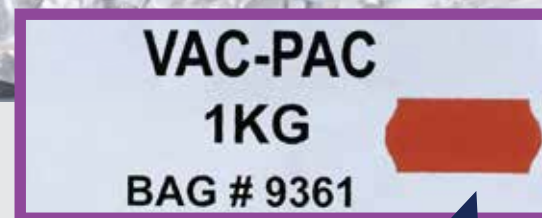

**ADP VAC PAC™** is an all-in-one bedding and enrichment material that minimizes potential introduction of contaminants. Irradiation treatment and vacuum packaging provides a virtually contaminant and microbial-free bedding for *germ-free* mice which helps maintain bio-security.

*ALPHA-dri® PLUS™ is blend of ALPHA-dri® bedding and ALPHA-twist® nesting material.*

## ADP VAC PAC™ is perfect for your study

- Irradiation provides good microbial control, eliminating the need for autoclaving
- The indicator strip on the package is orange before irradiation and turns red after treatment.
- **ALPHA-dri® PLUS™** bedding contains no endotoxins or mycotoxins, reducing the risk of compromising animal well-being.
- Vacuum packaged in small quantities helps ease of handling and access into isolators/change stations.
- Each package contains 2.2 lbs. or 1.9 Kg. of bedding, enough to fill 8 to 9 cages.
- Product integrity is quickly verified by inspecting the package.

After irradiation
