Enviro-dri®

Never settle for other nesting materials containing variable substances that are harmful to your research models.

DID YOU KNOW?

Each “piece” of Enviro-dri is composed of three strands.

Shepherd Specialty Papers is committed to prioritizing **EXCELLENCE IN THE CAGE**, by categorizing our products into the three performance categories below.

Research Integrity

Nesting material is a controllable research variable that research animals are exposed to 24/7.

Enviro-dri® is the material of choice to ensure the elimination of bedding derived confounding variables from nesting materials.

- Ensures outstanding thermoregulation
- Always consistent
- No limb entanglement
- Superior low dust levels

Animal Health & Welfare

Research animals give their lives for the advancement of science. In return, we at Shepherd believe it is our duty to provide bedding and nesting material that encourages species specific behaviors and overall health.

Enviro-dri® is an effective nesting additive in support of this formidable goal.

- Rodents build a complex high quality nest
- Amplify species-specific behaviors
- Made for easy for custom dosing
- A safe nesting choice

Operational Productivity

Nesting material is crucial to the health and welfare of the animals and the research goals of the investigators. However, it must also be able to be utilized effectively and efficiently within a large scale research facility.

Enviro-dri's economical cost and unique characteristics and overall performance supports facility wide usage.

- Packed Loosely; easy for custom dosing
- Most economical nesting material
- Virtually dust free
- Available in two grades (white & brown) & irradiated
- Easy disposal
