

ALPHA-nest[®]

Introducing a Better & Cleaner Nesting Enrichment Additive

Enhanced environmental enrichment

Appeals to rodents' natural behavior of nest building. Its long cotton fibers allow for easy shredding and manipulation.

Unparalleled cleanliness

Extremely clean due to being manufactured from 100% bleached cotton staple fibers to exacting standards.

Helps with grinding

The hard nature of ALPHA-nest provides rodents with food grinding problems, a distraction in turn reducing those issues

Low dust levels

Long cotton staple fibers eliminate the potential for airborne dust after shredding

Labor Savings

Pre-cut and each sheet can fit through wire cage lids for easy dispensing

No concern for limb entanglement

Does **not** contain threads, so rodents will not end up with limb entanglements

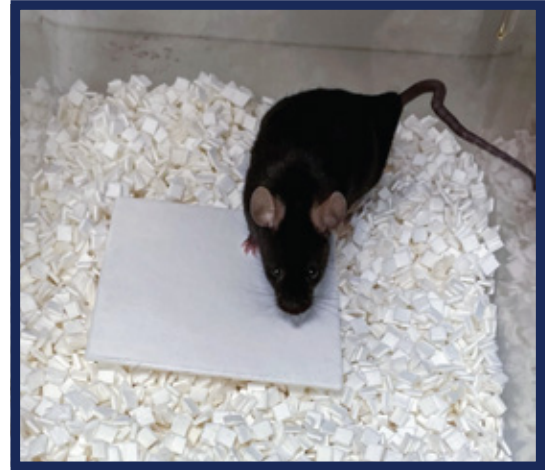

Autoclavable

Can be easily autoclaved

Availability

ALPHA-nest is sold in 3" x 3" squares. They are packaged in sealed plastic bags within 2,000- count cartons.

Irradiated upon request
