

SHEPSORB

Shepsorb is an embossed, single ply, non-laminated sheet is made from 33# or 42# basis weight material.

Common Uses

Shepsorb is commonly used for birds and not for animals with high urinary output or play with water valves/sipper tubes.

Features

Shepsorb reduces liquid runoff and movement of fecal material due to the waffled characteristic.

Cost Savings

This is an alternative to using more costly liners with short-term exposure.

Easier Handling

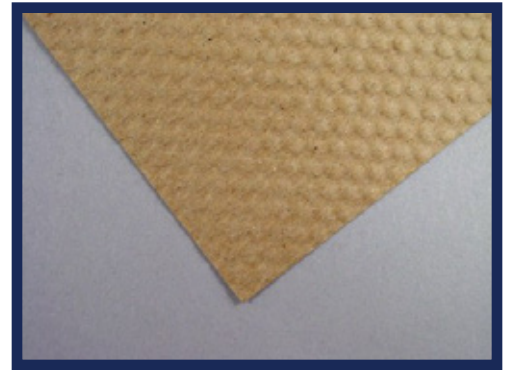

Semi-rigid sheets make handling easy.

Dust Elimination

Liners will not contribute to dust in the air as does noted with loose litter.

Custom Cut to Fit Multiple Applications

Sheets are cut fit you particular application for behavioral or other special use enclosures.
