

TECHBOARD™

Techboard is a highly absorbent, untreated technical grade cage board, with a dimpled top layer to reduce liquid run-off.

Multiple Uses

Techboard comes in 3 different grades:

Techboard- an absorbent top layer of waffled, untreated cage board.

Techboard K52- an absorbent top layer of waffled, untreated cage board with extra wet strength bottom layer.

Techboard II- a highly absorbent top layer of waffled, untreated cage board with extra wet strength bottom layer.

LEARN MORE

Highly Absorbent

Techboard's top layer is waffled allowing it be highly absorbent. It reduces liquid runoff and movement of fecal materials. Wastes and soiled boards are easier to remove.

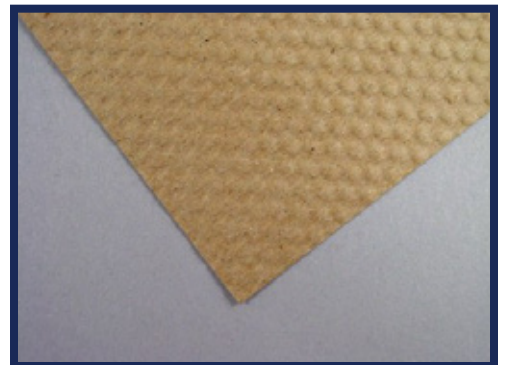

Highly Economical

Techboard, depending on the animal population, may be changed every 3-4 days instead of daily. Techboard sheets generally last longer and require less time to change than other cage liners.

Easier Handling

Semi-rigid sheets make handling easy.

Dust Elimination

Techboard will not contribute to dust in the air.

Custom Sizing

Techboard is custom cut to fit your needs. It is cut to the customers' requirements and is available in a wide range of sizes
