HAPPY SPRING!

OUR OFFICES WILL BE CLOSED ON 04/18/2025 (Good Friday) & 05/26/25 (Memorial Day)

WHAT'S HAPPENING AT SHEPHERD

SHEPHERD PARTNERS WITH BIOZ

AI-powered search engine

Bioz is an AI-powered search engine and platform that empowers life science researchers by helping them quickly find, compare, and select the most suitable products and tools for their experiments.

With Bioz, researchers can make data-driven decisions that accelerate drug discovery and scientific research.

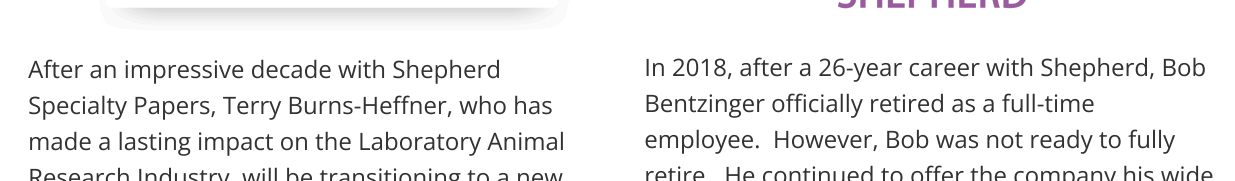

Key Benefits

- AI-driven product search and recommendations
- Simplified decision-making for lab researchers
- Faster progress in drug discovery and life science research

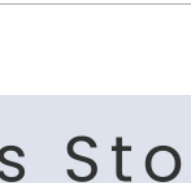

Stay tuned for more updates to come

Congratulations to Terry Burns-Heffner on being named Vendor of the year at INAALAS!

Personnel Updates:

After an impressive decade with Shepherd Specialty Papers, Terry Burns-Heffner, who has made a lasting impact on the Laboratory Animal Research Industry, will be transitioning to a new role as Director of Sales at Animal Specialties and Provisions.

In 2018, after a 26-year career with Shepherd, Bob Bentzinger officially retired as a full-time employee. However, Bob was not ready to fully retire. He continued to offer the company his wide set of skills and knowledge. He assisted with our overseas customers and directed our quality assurance efforts at our production facilities.

Customer Success Stories

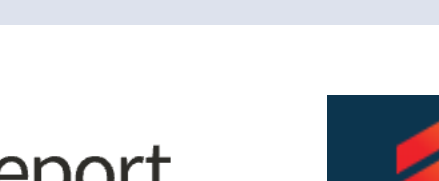

ALPHA - dri® PLUS

DR. JESSICA FELGENHAUER

We have seen a decrease in the number of spot changes based on our spot change criteria using the ADP (ALPHA-dri® PLUS). We have also had one lab group that was seeing an unwanted estrogenic induced phenotype. We removed from corn cob bedding and switched to ADP and the phenotype was no longer seen moving forward.

ALPHA - dri®

Before using ALPHA-dri®, we had leaking water valves and cannibalization. Since switching to ALPHA-dri®, we have less water leaks with this bedding and 90% less cannibalization. I would absolutely recommend ALPHA-dri®.

Research Breakthroughs

StanfordReport

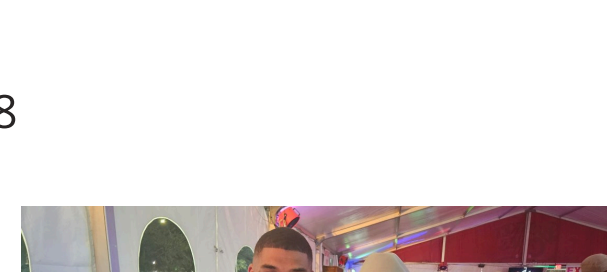

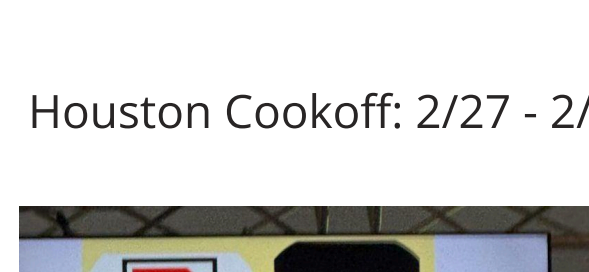

Summary: Aging & Geriatrics March 27, 2024 Old immune systems revitalized in Stanford Medicine **mouse** study (on ALPHA-dri®), improving vaccine response Those with aging immune systems struggle to fight off novel read more

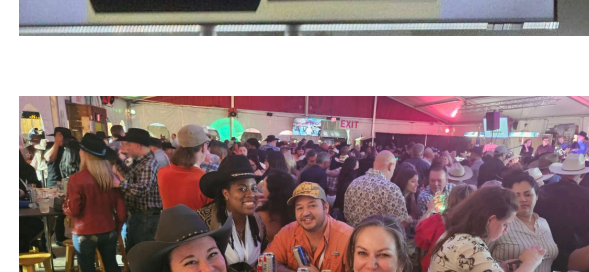

Summary: Importantly, ABBV-CLS-484 also appeared to reduce T cell exhaustion in mice and reinvigorate exhausted human T cells, a sign that the drug may be able to stave off a major pathway of resistance for immunotherapies. read more
