

ENVIRO-DRI®

TECHNICAL DATA SHEET

DETAILS

Enviro-dri® is made of crinkled, 3 layer-thick, natural or white paper strands that are perfect for small rodents to mimic burrowing and nesting. Mice build the most complex nests with Enviro-dri®.

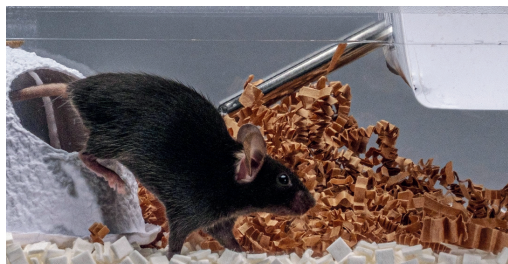

- Enviro-dri® is available in 10lb or 25lb box
- Available Irradiated

MATERIAL SPECIFICATIONS

Color	Natural or White
Package Sizes	10 & 25 lb boxes
Recommended amount per cage	6- 8 grams

1 piece = 3 strands

WHY ENRICHMENT MATTERS

Mice are built to interact with their environment

A systematic review of 186 studies examined how environmental enrichment affects the welfare of laboratory rats and mice.

WHAT THE RESEARCH SHOWS

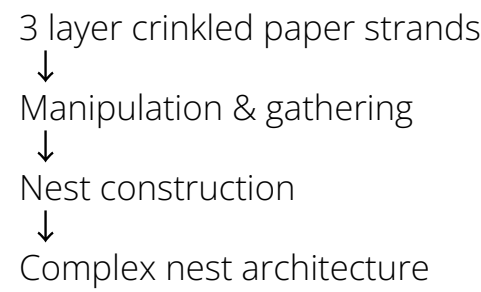

Enrichment Effect	Research Finding
 Cognition	Positive
 Social Behavior	Positive
Motor Function	Positive
↓ Abnormal Behavior	Reduced

WHY NESTING MATTERS

Nest building is a natural, highly motivated behavior in mice.

Providing appropriate nesting material gives mice an opportunity to **manipulate materials, construct nests, and create a more stimulating environment.**

ENVIRO-dri®

THE TAKEAWAY

Enrichment isn't just something inside the cage.
It's something the animal can interact with.
